NEW FROM XPANSIV® DATA AND ANALYTICS

Consolidated REC Market & Reference Data

Consolidated OTC, exchange, spot, and forward market and reference data

Xpansiv® Data and Analytics is pleased to announce the creation of the most comprehensive pricing series for Renewable Energy Credit (REC) markets sourced from Xpansiv's global environmental commodity infrastructure.
Xpansiv's pre- and post-trade REC market data combines transaction pricing from our CBL electronic trading platform, Evolution Markets' over-the-counter (OTC) brokerage operations, and Xpansiv® Connect's portfolio management system. By mapping instrument-level reference data, we have created a harmonized REC data series without parallel

Benefits of Xpansiv's New REC Data Product

Xpansiv's consolidated REC data provides unprecedented insights into the REC market.

API and a Web-Based Data Portal:
Streamline and expedite data ingestion while reducing the risk of errors.

Harmonized Data Taxonomy:
Supports enterprise-wide applications across trading, risk management, portfolio valuation, and reporting.

Independent, Neutral, Multi-Sourced Data:
Sets a new standard for REC data robustness and integrity.

Cost and Operational Efficiency:
Replace multiple, inconsistent data sources with a single, harmonized stream, covering 120+ REC markets across seven registries.

Peerless market coverage

COVERAGE:

Xpansiv's revolutionary REC data product provides unrivaled depth with daily insights for more than 120 different REC products across seven different registries, including PJM, NEPOOL, ERCOT, WREGIS, NAR, NYGATS, and MIRECS

DATA TYPES:

- Consolidated End-of-Day Service: Includes Evolution Markets indicative prices and the CBL spot exchange prices and volume.
- Historical Data: Daily REC prices available back to 2019.
- Reference Data Fields: Allows for filtering on RPS Standard, Product, Vintage, RPS State, Registry, and Price Type.
- Spot and Forward Pricing: Insights include spot market transactions as well as forward indicative marks.
- Delivery Options: API, SFTP, email reports, web-based Data Lake, and Visualization platforms.

CBL Spot Exchange

SPOT TRADE AND ORDER PRICES AND VOLUMES

- Exchange-matched trades
- Firm bids and offers
- Exchange-settled OTC block trades
- Historical data to 2019

Evolution Markets

SPOT AND FORWARD OTC PRICES

- End-of-day spot and forward indicative data
- Historical data to 2019

Xpansiv® Connect™

INSTRUMENT-SPECIFIC REFERENCE DATA

- Unique instrument identifiers
- Registry and vintage
- RPS standard and state

NEW FROM XPANSIV® DATA AND ANALYTICS

Consolidated REC Market & Reference Data

Xpansiv® consolidated REC data use cases

Xpansiv®'s consolidated exchange, OTC, and infrastructure provides OTC and exchange-transaction prices, firm and indicative orders, and forward price data. Our robust, independent, neutral, and verifiable data is ideal for applications that require the highest level of data integrity, including:

Front-Office Analysis:	Enables traders to make data-driven decisions and optimize REC portfolios with greater clarity and confidence.
Market Research:	Provides analysts with access to multi-source data through a single, harmonized product, enabling more robust analyses of market trends.
Asset Investment:	Helps investors to model projected renewable asset returns.
Mark-to-Market:	Empowers valuation teams with independent, verified end-of-day pricing information to mark portfolio values.
Risk Management:	Supports risk managers in identifying and mitigating potential market risks.

Powering unprecedented REC market insights

Data Aggregation:
Users can aggregate and co-mingle order, trade, and indicative data into a single chart using Xpansiv® Connect reference identifiers.

Flexible Access

The new consolidated end-of-day and historical REC data is now accessible via API, on the Xpansiv Data and Analytics web-based platform, SFTP, and via daily reports. It is also available through approved third-party data distribution partners.
