The Global Exchange Platform for End-to-End Environmental Market Access

Xpansiv powers global environmental markets through its leading exchange, CBL.

CBL supports high-integrity trading across renewable energy credits, carbon, and water markets—providing real-time market access, execution, and settlement. With secure connectivity to leading registries, market participants can manage transactions and gain market insights from a single, integrated platform.

CBL®

An Xpansiv® Market

KEY BENEFITS

Automated Trade Execution
Automated Trade Execution Streamlined facilitation for both screen-based and over-the-counter (OTC) transactions with same-day (T+0) cash and product settlement.

Secure Registry & Banking Integration
Settlement is enabled through secure connections to registry and designated bank accounts, ensuring transaction integrity, speed, and compliance.

Customizable Market Interface
Trade by project type, standard, region, vintage, or contract type—across both voluntary and compliance markets—via an intuitive, filter-rich interface.

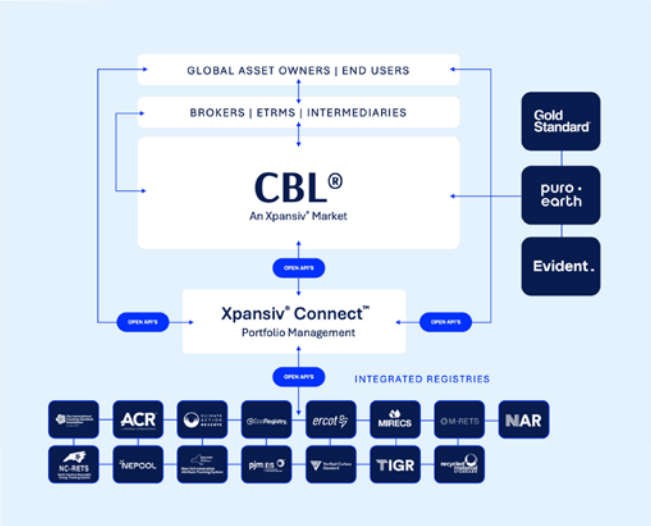

Direct Counterparty Access
Conduct trades without bilateral counterparty agreements in place. Our comprehensive KYC/AML onboarding process supports secure, verified trading with a global network of counterparties.

Automated Integration
CBL Markets are connected into Xpansiv® Connect™ providing customers with seamless portfolio management of leading, API-connected environmental registries across voluntary and compliance markets.

WHO USES CBL?

Xpansiv CBL serves a broad and dynamic range of market participants including:

- Banks and Trading Houses
- Energy Companies and Utilities
- Project Developers and Consultants
- Multinational Corporations and Compliance Buyers
