Buyer	Greater of \$3.30/ML or 1.1% per annum	Plus water authority term transfer fees
Seller	Greater of \$3.30/ML or 1.1% per annum	

ⁱ H2OX facilitates the trade of allocation between water accounts.

ⁱⁱ All applications to move allocation through an Inter Valley Trade (IVT) constraint such as the Murrumbidgee IVT, Goulburn IVT or Barmah Choke will be lodged simultaneously by H2OX through the system determined by the relevant water authority.

Allocation is moved between client water accounts. It is the responsibility of the client to ensure H2OX is provided with the correct volume to ensure the application is valid.

ⁱⁱⁱ H2OX exchange fee calculated on the total contract price being volume multiplied by price per megalitre

^{iv} H2OX exchange fee charged annually based on the lease volume and annual lease price per megalitre.
